Experience Life
in HyperReal
With the sharpest images and brightest colours. TV will never be the same.
With smooth, clear lines, an ultra-slim design, and eco-friendly features-you've never seen television like this before.
Picture Quality
Design
Connectivity

There can be only one thinnest, clearest, most elegant television. Easily, it's Samsung's LED TV Series 7. Breathtakingly thin, it's designed as one seamless piece of flawless crystal. On its LED screen, vivid details are captured in every frame. Picture edge-blur removed and full, robust colour restored to each pixel. Watch television programs, web content or your own, knowing you're also being kind to the environment. It's a remarkable feat of design, on or off.

Picture Perfect

For images that are stunningly true to life you need the 3 Cs: contrast, colour and clarity. LED TV Series 7 has them. Its Mega Contrast Ratio feature brings out all the shades of gray as well the shades of amber, fuchsia and magenta. A Wide Colour Enhancer Pro with LED gamut ensures every entire pixel is robust and vibrant. This enables the TV to display a wider range of natural colours and provide greater depth. Even with subtle colours. Plus our 100Hz Motion Plus technology removes edge-blur. Leaving your picture smooth and crisp. And your jaw, dropped.

Depth without depth.

Unlike other "slim" televisions, LED TV Series 7 is one of the slimmest televisions in the world. Instead of multiple parts molded together, it's one solid, seamless, incredibly beautiful advanced television. Elegantly supported by a unique crystal neck. You'll have no trouble finding a place for it in any room.

The world wide web just got wider.

Can't decide if you'd rather watch TV or your favourite sites on the web? Do it all on the LED TV Series 7. An easy to use widget lets you watch, add or delete content. View it all on the roomy sidebar or across the incredibly wide screen. With LED TV Series 7, TV goes way beyond just TV.

Green works in any room.

The LED TV Series 7 is easy on the planet as well as the eyes. Its recyclable bezel frame contains no VOCs. And by using mercury-free LED lights that require less energy, less CO_2 is emitted. So you can put your feet up and relax knowing you're leaving a smaller carbon footprint.

It takes only one screw to mount the astonishingly slim LED TV Series 7. Just like a picture frame. Only this frame is made with a hint of amber. We call it a Crystal TV. One look at it and its soft, square corners is all it takes to see that this isn't just a TV you're hanging. But a work of art.

4 HDMI

If there's an easier way to get HD video and pictures onto the LED TV Series 6 we'd like to know. All it takes is one single HDMI cord and images are transferred without data loss or headaches.

Getting on TV made easy.

LED TV Series 7 takes the struggle out of sharing your talent with the world, or at least with your family. Transfer your videos, music and photos from your PC or from your DLNA mobile device. Wirelessly and effortlessly. It even connects with multiple PCs. Who said you need connections to get on TV?

Your audience awaits you.

There's no excuse anymore for leaving all those great digital pictures and videos in your cameras. All you need with the LED TV Series 7 is USB 2.0 movie connection cord. Just plug it in then instantly, play, save or delete. It even works for your music collection. So now anytime is showtime.

Library hours extended

Suppose you feel like playing a game of chess or cooking instead of watching TV. LED TV Series 7's Content Library Flash let's you do that too. There's so much you can do with LED TV Series 7. Including watching it.

Pebble Shaped Remote Control

Like a precious stone or a sea smoothed pebble, the pebble shaped remote control is an exquisite piece of electronic art. It shines with a rare beauty that enriches its environment, making your world a more beautiful place.

Samsung UA46B7000 Full HD 1080P LED LCD TV
